

Integrated and optimal care research theme

Professor Chris Salisbury
Theme lead

Stakeholders' priorities for research

Frailty and end-of-life care

Social prescribing

Stakeholders' priority research questions

Frailty and end-of-life care

1. What combined interventions may be effective for those at different stages of the frailty
2. Which measurable indicators best predict outcomes in frail individuals?

Social prescribing

3. What is the most effective and cost-effective model of social prescribing?

Recent and current studies

- RAPCI: Consequence for primary care health delivery during the COVID-19 pandemic
- ReSPECT: evaluating emergency care plans for care home residents
- Implementation of a national 'De-adoption' programme

IOC Project:

Delays in discharge from hospital of older people living with frailty

Dr Heather Brant, NIHR ARC West, Dr Kyra Neubauer, Sarah Biggs
